

WHY HOST MICROSOFT EXCHANGE 2010 WITH ETRN.COM?

ETRN.com offers the latest version of hosted Exchange – Exchange 2010. Users of older versions of Exchange as well as POP email users will benefit from the enhanced features of Exchange 2010. Some of the reasons why it outperforms the previous:

- Full browser support for a variety of browsers including Internet Explorer and Safari
- Larger mailbox options – 25GB of storage for Standard Plans and unlimited for Advanced and BPS Plans
- Enhanced features of OWA 2010 with conversation style messaging

Because your business relies on email as one of the most important means of communication, you want to choose a provider that can offer the most secure infrastructure available.

RELIABILITY AND UPTIME

We offer a **99.999 percent uptime service level agreement**.

Our multi-million dollar infrastructure includes datacenters featuring Dell, EMC and Cisco hardware and multiple connections to Tier-1 Internet providers – assuring high availability and the fastest round trip for your email. This Fortune 50 infrastructure is finally available to small- and medium-sized businesses.

ADD-ON FEATURES

We offer a complete range of add-on features including **hosted BlackBerry® services and ActiveSync** for Windows mobile devices so you can instantly activate email service for your handheld. Rather than spending thousands of dollars on your own server, you can use our managed service for just a few dollars a month.

You can also add **SharePoint** for document collaboration; **Office Communications Server 2007** for increased productivity through secure instant messaging; and file sharing and archiving – from simple message journaling to keep an exact copy of all your message, to compliant archiving, which fulfills regulatory requirements from the main US regulations—HIPAA, GLBA, SOX, SEC, FINRA and FRCP as well as other state/federal requirements.

ETRN.com

STRICT SECURITY AND COMPLIANCE

ETRN.com adheres to the industry's strictest regulations for security and compliance.

- **Backed by a SAS 70 Type II audited location:** SAS 70 is an auditing statement issued by the Auditing Standards Board of the American Institute of Certified Public Accountants (AICPA), officially titled "Reports on the Processing of Transactions by Service Organizations." SAS 70 defines the professional standards used by a service auditor to assess the internal controls of a service organization and issue a service auditor's report.

PC OR MAC

Many Exchange hosting companies do not offer both Outlook (for PC) and Entourage (for Mac) support. We offer both, so your staff can use either PCs or Macs. We also offer free **Outlook Web Access (OWA) 2010** - which works on all major web browsers - allowing your users the ability to access their email online from anywhere.

More and more SMBs are making the switch to hosted Exchange. Lower costs, better security and the ability to re-deploy IT staff for other projects and initiatives are attractive advantages of the Software-as-a-Service model. When you're ready to evaluate your options, call **866-271-ETRN** to speak with a representative about how your business can benefit.
